ABOUT ME

Greetings,

I am excited to introduce my professional experience and goals as a Full Stack Developer. I believe that this would be the ideal challenge for me, as I'd like to participate in creating something innovative and creative with an organization.

When I had completed my Animation course from Arena Animation, my first job was as a Graphic Designer. I have worked with different firms, the best one of which was Cimpress India, where I tried to develop my skills. As I was the sole breadwinner and had family, I could not continue with the process as it lacked time for work and home.

I decided to resign from my job in June 2024 and devote my time to learning full-stack development. This training was to take four months of full-time dedication because, being a steadfast believer in continuous learning and staying updated with the rapidly changing world of technologies, I deemed it imperative.

I look forward to working with a very innovative organization that will offer me opportunities to work on high-impact projects and help develop my skills as a developer. With determination and a will to learn, I believe I can face all challenges and expand my career scale.

I look forward to the opportunity to discuss how my skills and experiences may align with the goals of your team.

Thank you for considering my application.

Sincerely,

Zulkarnain Surti
