About Me

Dear Hiring Team,

It is with genuine enthusiasm that I present my professional experience and aspirations as a Full Stack Developer. I approach my work with a holistic perspective, viewing myself as a versatile contributor capable of managing projects from initial branding and logo design through to the development and deployment of sophisticated full-stack websites. Essentially, I am committed to contributing to a company's growth from its nascent stages.

My professional trajectory is driven by a desire to innovate and create within a dynamic organization. Following the completion of my Animation course at Arena Animation, I embarked on a career as a Graphic Designer. My tenure at Cimpress India provided a significant platform for skill development. However, as the primary provider for my family, I found the demanding nature of the role limited my capacity to achieve a balanced work-life integration.

In the past two years, I have strategically transitioned towards full-stack development. I began with freelance front-end projects, and since resigning from Cimpress in June 2024, I have dedicated myself to mastering the MERN stack, crafting projects that enrich my portfolio. I am now seeking a position within an innovative organization that will challenge me with high-impact projects and foster my growth as a developer.

Possessing a resolute determination and a fervent desire to learn, I am confident in my ability to navigate complex challenges and expand the scope of my career. I eagerly anticipate the opportunity to discuss how my diverse skill set and experiences can align with your team's objectives. Thank you for your thoughtful consideration.

Sincerely,
Zulkarnain Surti
